

# CLASSIC DOORS SIZE AVAILABILITY

The Classic Doors ordering system will automatically generate the recommended no of hinges required for each door. This recommendation is determined by the height, width and weight of the door. Also, the weight of the panel will be shown in "Preview Door" to assist in calculating the correct type of other hardware applications.

Hinge Drilling pattern available for Blum & Hettich or 35 hinge holes only for other brands.

Other Bi-Fold Door options are available, please contact us

Face Area is Height X Width e.g. For a hinged door of 700 mm x 500 mm the Face Area is .35 Sq metres [7 X .5 = .35].

If you require a hinged door 1300 mm high, divide the maximum face area of .845 Sq metres by 1.3 = .650.

Therefore the maximum width door available for a height of 1300 mm is 650 mm.

Where the doors are bi-fold the area shown is for the 2 doors combined.
